BOTTOM LINE

PERFORMANCE

U.S. ARMY PEO EIS PM AcqBUSINESS

BuddoBot manages and performs key functions on two critical task orders – Information Technology Operations (IT Ops) and Information Assurance (IA).

IT Ops - Operate, maintain, upgrade, and support computer, server and network hardware/software.

- Continuity of Operations (COOP)
- Secure Army Gold Master (AGM)
- WLAN, LAN, WAN Support and Configuration
- VMware ESX
- Manage, Build, and Deploy Win2k3, Red Hat, and Solaris Servers
- Storage Area Network (SAN)
- Data Center Migration

IA - Plan, implement, and conduct system security checks at all client facilities required to improve, maintain, recover and restore information systems and data.

- Certification and Accreditation
- IAVM (Information Assurance Vulnerability Management)
- Retina Vulnerability Assessments
- Policy and Procedure Development
- FISMA Compliance
- ArcSight, Tripwire, HBSS

OFFICE OF NAVAL RESEARCH (ONR)

BuddoBot completed a full assessment of ONR's Information System (IS) environment to assure vulnerability findings were identified and courses of action including remediation were planned appropriately. BuddoBot guided and assisted ONR IT and IA staff to work towards the completion of all applicable STIGs, Security Readiness Review Scripts (SRRs), Gold Disk Remediation, Retina IAVA completion, and Server and Desktop Image correction. BuddoBot successfully removed over 300 vulnerabilities across both server and desktop platforms. BuddoBot also created zero CAT-I and CAT-II images for both desktops and servers that have been deployed across ONR's legacy network.

U.S. ARMY MATERIEL COMMAND (AMC)

BuddoBot performed Information Assurance functions for AMC's Army Enterprise Portal (AEP), the Army's largest enterprise portal.

- DIACAP Preparation and Review
- STIG Guidance and Compliance
- Documentation and Process Review

U.S. NAVY ENTERPRISE RESOURCE PLANNING (ERP)

BuddoBot performed development for the Navy ERP program to include a complete redesign of current HTML/CSS/JavaScript/Flash rendering packages to meet the program's new branding while creating scalable templates to accommodate program expansion.

- HTML/CSS/JavaScript Template Coding
- Flash Player Design for Video Playback
- 509 Accessibility Standard Compliance Development
- Video Tutorials for Implementation, Development and Troubleshooting
